

COACH  
— PONTBOONS —

At Coach Pontoons, we believe the perfect tritoon must be versatile, durable, and timeless. While we focus on keeping it “simple”, we take great pride in sourcing premium materials, incorporating innovative technology, and crafting a vessel capable of lasting a lifetime.

Coach Pontoons’ construction is second to none in the industry. We encourage you to take the time to learn more about our tritoons. You will find the materials are of the highest quality and the craftsmen and women are the best in the industry. Every tritoon that comes off the production line is a testament to their pride in workmanship and passion for product excellence.

We are committed to delivering an owner experience that is effortless and enjoyable every step of the way...that’s the “simple” part of Coach Pontoon’s philosophy.

Welcome to Coach Pontoons.

CONSTRUCTION

Precision-crafted performance, responsive handling, it all starts with Coach Pontoon’s exclusive **HDRS** (Heavy Duty Rail System)

3 & 5 SERIES  
TOUGH ENOUGH FOR ANY ADVENTURE

**POWER KEELS** – Coach Pontoon’s power keels include a 2” nose cone keel that transitions to a solid bottom keel that runs the entire length of each 25” diameter pontoon tube. Combined, these keels are beefy for beaching the pontoon, excellent for saltwater application, and provide greater tracking in the roughest water conditions.

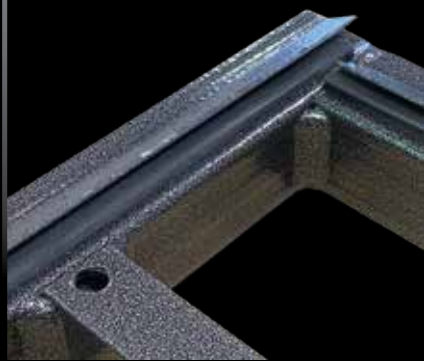

**FULL-LENGTH RISERS** are used on the center pontoon as well as the inside of the port and starboard pontoons. These reduce chassis and pontoon flex. The outside risers are designed with access openings for easy and quick service needs.

**STAINLESS STEEL ELEVATOR BOLTS** and **TEK SCREWS** are used to secure the 3/4”, seven-ply, pressure-treated plywood deck to the chassis.

Heavy-duty, **3” SIDE RUB RAILS** provide additional rigidity and superior deck protection from side impacts. Fences and stainless steel cleats are mounted through this aluminum rubrail and secured to the chassis.

Quiet ride **FOAM INSERTS** hold fence panels tight and rattle free.

STRONG

# PERFORMANCE CHASSIS

It's all about the ride, whether fast or slow, Coach Pontoons delivers...

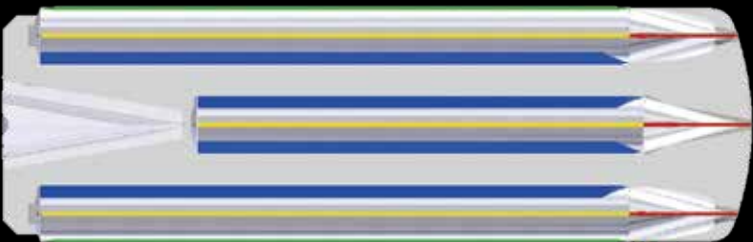

The Coach Pontoon chassis is a true powerhouse built to deliver a smooth ride and high performance handling to meet all your water sports fun.

**SPORT-TOON:** The Sport-toon performance chassis is standard on the 3-Series family. This chassis comprises three 25" diameter pontoon tubes, full aluminum interlocking under deck wave performance shields,full length power keels, lifting strakes, and hydraulic steering.

**HP PERFORMANCE PACKAGE:** The HP performance package is rated for 400HP engines and is *optional*. This chassis comprises three 25" diameter pontoon tubes, full aluminum interlocking under deck wave performance shields, full length power keels, lifting strakes, a 58 gallon fuel tank, and hydraulic steering. This chassis is ideal for larger bodies of water and delivers maximum performance handling for extreme water sports.

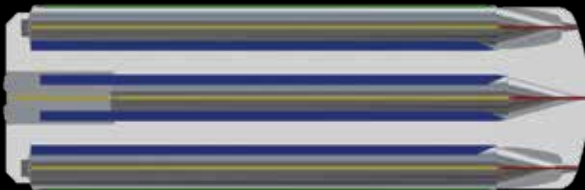

**BI-TOON:** Rated for up to 150HP engines, the Bi-toon chassis is *optional* on the 3-Series family. This chassis comprises two 25" diameter pontoon tubes with full length power keels, full performance shields, and hydraulic steering. Lifting strakes are an option on this chassis. A Bi-toon is ideal for smaller for HP-limited lakes.

**XTREME WATER PACKAGE:** Required for boats powered with 300HP engines and above. This side extrusion is added to the exterior tubes and provides additional strength for extreme rough water conditions.

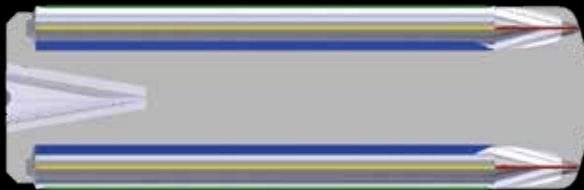

**SPORT-TOON**  
\*\*STANDARD 3-SERIES\*\*  
28 gal fuel  
Rated up to 200HP

- Lifting Strake
- Solid Bottom Keel
- Power Nose Cone Keel

**HP PACKAGE**  
Optional 3-Series  
58 gal fuel  
Rated up to 400HP

**BI-TOON**  
Optional 3-Series  
28 gal fuel  
Rated up to 150HP

## PERFORMANCE TERMINOLOGY

- A** Interlocking Under Deck Wave Performance Shield comprises custom fit aluminum panels mounted to the underside of the pontoon deck, angled and secured into riser flanges. Coverage from the tip of the bow to the end of the standard extended rear swim platform ensures that our engines can deliver the smoothest and quietest rides at the highest of speeds.
- B** Lifting Strakes mounted on the interior tubes provide quick-to-plane lift and tighter turning radius.
- C** Extruded Splash Fins redirect water away from the pontoon's deck.
- D** Power Keels — 2" thick nose cone power keel transitions into a solid bottom keel that runs the full length of every pontoon tube. Combined, these keels are beefy for beaching the pontoon, excellent for saltwater application, but also provide greater tracking in the roughest water conditions.

# HELM | TECHNOLOGY | SOUND

Smart helms give you remarkable command and control at your fingertips

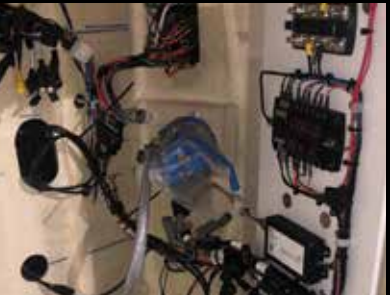

Coach Pontoons installs only NMEA 2000® digital gauges to ensure our electronics "talk" to each other through a communications link established between our standard Simrad® (GO7/9 depending on model) and the engine gauge to ensure all vital data is exchanged between the systems in real-time. Simrad GO7 offers a crisp and bright daylight viewable 7" touchscreen display that is easy to understand and navigate with built-in available features such as traditional sonar, CHIRP and DownScan Imaging™ views. Customizable displays showing engine data, speed, GPS fuel, trim/tach, water and air temperature and navigation.

CoastKey® a true keyless ignition that offers safety and security. The system will not allow engine to start if throttle is engaged. Use the handy fob or enter a personal PIN Code.

Fiberglass helms feature NMEA 2000® digital gauges Simrad® electronics, Gussi Italia® steering wheels, with tilt, great leg room and ample storage including a glovebox.

Coach Pontoons use only premium tinned wiring (ideal for harsh saltwater use), DEUTSCH™ connectors, and "race-rigging" precision wiring beneath the helms.

Raised helm is included with the deluxe option.

## UNCOMPROMISING SOUND

**WET SOUNDS – DELIVERS UNCOMPROMISING SOUND**  
Wet Sounds™ Amplified Head Unit with Bluetooth® and Pandora-ready dual zone capable

LED marine speakers bring hot sound and cool lighting to our pontoon.

The RGB billet controller is mounted on the helm and provides lighting color control.

## FURNITURE | FLOORING

Coach Pontoons are known for their classic look and luxury feel, but Coach Pontoons delivers on functionality too...

Coach Pontoons use only premium marine-grade vinyls and foam packs. Vinyls have easy clean top coats requiring only soap and water to clean.

Our seat bases are all stay-dry rotocast with built-in tracts to direct water away from the insides.

Infinity™ Luxury Woven Flooring is used on every Coach Pontoon. Superior material that is designed for casual luxury and is durable, has high resistance to stains, mold or mildew and made in the USA.

## BIMINI | COVERS

Our standard bimini and mooring cover are handcrafted and fitted specifically for Coach Pontoons. We use specially designed stainless steel, easy connect hardware and marine-grade fabrics to ensure high performance and low maintenance. Our canvas is urethane coated to provide resistance to UV rays, water, mold, and mildew.

Stainless steel  
easy connect  
hardware

Even the canvas we choose for our pontoons are carefully selected for handling the demands of Mother Nature. Superior strength and durability combine with long-term color retention, water repellance, and breathability deliver a truly versatile mooring cover and bimini canvas.

Coach Pontoon bimini frames feature a short rear strut for trailering, an adjustable front strut to ensure an always taut open bimini, and strut clips to eliminate bimini rattle.

We design our fences with a raised rail to limit contact between bimini frame and furniture. The added inches also make our bimini "ceiling" height ideal for our taller customers!

Coach Pontoon mooring covers are designed with easy clips to make removing or installing your mooring cover a quick and easy job. Our velcro flap cutouts ensure a snug fit around bimini top strut. Covers are double-stitched with fully concealed lap seams and have reinforcements sewn in at the windshield and other stress points for added durability. Our mooring cover poles are standard with vents to ensure optimal ventilation.

Mooring  
Cover  
Easy Clip

Sleek, sporty, smart...the 3-Series is loaded with a long list of luxury features
