**K**eeping it simple, yet sacrifice nothing, is Coach Pontoon's philosophy...and when we say "simple" that doesn't mean we cut any corners. We believe our construction is second to none in the industry and we encourage you to take the time to learn more about our pontoons. You will find the materials are of the highest quality and the craftsmen and women are the best in the industry. Every pontoon that comes off the production line is a testament to their pride in workmanship and passion for product excellence.

**C**oach Pontoons embraces innovation and technology such as the addition of smart NMEA 2000® digital helm technology. Our pontoons come standard with more features consumers desire and designs that offer a perfect balance between welcoming relaxation and sophisticated tailoring. Our attention to detail and uncompromising quality standards applied to every Coach Pontoon is also backed by our **10-year bow-to-stern warranty**.

**W**e are committed to delivering an owner experience that is effortless and enjoyable every step of the way...that's the "simple" part of Coach Pontoon's philosophy.

*Welcome to Coach Pontoons!*

Sincerely

Chris Riddle  
CEO / Co-Founder

# CONSTRUCTION

Precision-crafted performance, responsive handling, it all starts with Coach Pontoon's exclusive **HDRS** (Heavy Duty Rail System)

Fully welded C-Channel  
Extended Rear Swim Deck

Average 14.3" heavy-duty  
C-channel placement  
makes our Sport-toon  
and HP Package chassis  
a solid foundation

Full-length interior  
risers reduce  
deck flex

Fully welded bow with wrapped C-channel  
provides superior deck protection

**POWER KEELS** – Coach Pontoon's power keels include a 2" nose cone keel that transitions to a solid bottom keel that runs the entire length of each 25" diameter pontoon tube. Combined, these keels are beefy for beaching the pontoon, excellent for saltwater application, and provide greater tracking in the roughest of water conditions.

**FULL-LENGTH RISERS** are used on the center pontoon as well as the inside of the port and starboard pontoons. These reduce chassis and pontoon flex. The outside risers are designed with access openings for easy and quick service needs.

**STAINLESS STEEL ELEVATOR BOLTS** and **TEK SCREWS** are used to secure the 3/4", seven-ply, marine-grade pressure-treated plywood deck to the chassis.

Heavy-duty, **3" SIDE RUB RAILS** provide additional rigidity and superior deck protection from side impacts. Fences and stainless steel cleats are mounted through this aluminum rubrail and secured to the chassis.

Quiet ride **FOAM INSERTS** hold fence panels tight and rattle free.

# PERFORMANCE CHASSIS

It's all about the ride, whether fast or slow, Coach Pontoons delivers...

The Coach Pontoon chassis is a true powerhouse built to deliver a smooth ride and high performance handling to meet all your water sports fun.

**BI-TOON:** Rated for up to 150HP engines, the Bi-toon chassis is standard on the 3-Series family (optional on 5-Series). This chassis comprises two 25" diameter pontoon tubes with full length power keels, rear performance shields, and Baystar™ hydraulic steering. Lifting strakes and full under deck wave performance shields are options on this chassis. A Bi-toon is ideal for smaller or HP-limited lakes.

**SPORT-TOON:** The Sport-toon performance chassis is rated for 200HP engines and is standard on the 5-Series family (optional for 3-Series). This chassis comprises three 25" diameter pontoon tubes, full aluminum interlocking under deck wave performance shields, full length power keels, lifting strakes, and Seastar™ hydraulic steering.

**HP PERFORMANCE PACKAGE:** The HP performance package is rated for 400HP engines and is optional. This chassis comprises three 25" diameter pontoon tubes, full aluminum interlocking under deck wave performance shields, full length power keels, lifting strakes, a 60 gallon fuel tank, and Seastar™ hydraulic steering. This chassis is ideal for larger bodies of water and delivers maximum performance handling for extreme water sports.

## XTREME WATER PACKAGE:

Required for boats powered with 300HP engines and above. This side extrusion is added to the exterior tubes and provides additional strength for extreme rough water conditions.

Extreme Water Package

### BI-TOON

Standard 3-Series

28 gal fuel

Rated up to 150HP

### SPORT-TOON

Standard 5-Series

28 gal fuel

Rated up to 200HP

### HP PACKAGE

Optional All-Series

60 gal fuel

Rated up to 400HP

Blue Lifting Strake

Yellow Solid Bottom Keel

Red Power Nose Cone Keel

Green Extreme Water Package *Optional*

## PERFORMANCE TERMINOLOGY:

- (A) **Interlocking Under Deck Wave Performance Shield** comprises custom fit aluminum panels mounted to the underside of the pontoon deck, angled and secured into riser flanges. Coverage from the tip of the bow to the end of the standard extended rear swim platform ensures that our engines can deliver the smoothest and quietest rides at the highest of speeds.
- (B) **Lifting Strakes** mounted on the interior tubes provide quick-to-plane lift and tighter turning radius.
- (C) **Extruded Splash Fins** redirect water away from the pontoon's deck.
- (D) **Power Keels** — 2" thick nose cone power keel transitions into a solid bottom keel that runs the full length of every pontoon tube. Combined, these keels are beefy for beaching the pontoon, excellent for saltwater application, but also provide greater tracking in the roughest of water conditions.

# HELM | TECHNOLOGY | SOUND

Smart helms give you remarkable command and control at your fingertips

5-Series Dual Console (shown with optional RGB accent lights)

Coach Pontoons installs only NMEA 2000® digital gauges to ensure our electronics “talk” to each other through a communications link established between our standard Simrad® (Go5/7/9 depending on model) and the engine gauge to ensure all vital data is exchanged between the systems.

Fiberglass helms feature NMEA 2000® digital gauges, Simrad® electronics, Gussi® Italian steering wheels, with tilt, great leg room and ample storage. (Raised helms are standard on all 5-Series.)

Coach Pontoons use only premium tinned wiring (ideal for harsh saltwater use), DEUTSCH™ connectors, and “race-rigging” precision wiring beneath the helms.

## UNCOMPROMISING SOUND

*Wet Sounds – delivers uncompromising sound*

Wet Sounds Amplified Head Unit with Bluetooth® and Pandora-ready LED marine speakers bring hot sound and cool lighting to our pontoon (3-Series come with a remote; 5-Series models have an RGB billet controller mounted on the helm)

Two bass tubes (one amplified and one passive) (standard on 5-Series, optional on 3-Series)

# FURNITURE | BIMINI | COVER

Coach Pontoons are known for their classic look and luxury feel, but Coach Pontoons delivers on functionality too...

Coach Pontoons use only premium marine-grade vinyls and foam packs. Vinyls have easy clean top coats requiring only soap and water to clean.

5-Series foam packs are constructed with an added suspension foam layer to ensure the most comfortable seat in the industry.

Our seat bases are all stay-dry rotocast with built-in tracts to direct water away from the inside, vented bottoms to allow water to escape to quicken drying beneath the seats, drop-down hinges lower the seat bases down for easy access to storage items.

*5-Series furniture shown in Surf "tan"*

Stainless steel easy connect hardware

Our standard bimini and mooring cover are handcrafted and fitted specifically for Coach Pontoons. We use specially designed stainless steel, easy connect hardware and marine-grade fabrics to ensure high performance and low maintenance. Our canvas is urethane coated to provide resistance to UV rays, water, mold, and mildew.

Coach Pontoon bimini frames feature a short rear strut for trailering, an adjustable front strut to ensure an always taut open bimini, and strut clips to eliminate bimini rattle.

We design our fences with a raised rail to limit contact between bimini frame and furniture. The added inches also make our bimini "ceiling" height ideal for our taller customers!

Coach Pontoon mooring covers are designed with easy clips to make removing or installing your mooring cover a quick and easy job. Our velcro flap cutouts ensure a snug fit around bimini top strut. Covers are double-stitched with fully concealed lap seams and have reinforcements sewn in at the windshield and other stress points for added durability. Our mooring cover poles are standard with vents to ensure optimal ventilation.

Mooring Cover Easy Clip

Mooring Cover

## S-SERIES

Sleek, sporty, smart...the 5-Series is loaded with luxury features

### STANDARD FEATURES

- Tri-toon "Sport-toon" Chassis with Lifting Strakes, Performance Shield, Power Full Length Keels

## FLC FLOORPLAN

Whether it's an evening cruise, an afternoon at the sandbar, or tubing with the kids, the FLC floorplan delivers.

## FLC HIGHLIGHTS:

- A split backrest lets both the rear-facing lounge and forward-facing seating be used at the same time!
- The large bed is roomy enough for the whole family and the huge storage beneath the lounge is perfect to store all your boating supplies.
- FLC features four RGB lit speakers. Adding two rear-facing speakers is an available option (shown in photo).
- Extended rear swim platform and ski tow bar make watersport access easy.

Bow shown with optional filler seat and portable cupholders

Optional FLC SST safety rail and gate enables easy sunbed access

## FOR MOMENTS LIKE NO OTHER

Beautifully appointed and handcrafted interiors

RLC HIGHLIGHTS:

- Curvaceous oversized rear loungers feature loads of storage and multiple built-in cupholders.
- Perimeter padding also enables forward-facing lounging.
- Each furniture piece also provides large storage areas for your boating supplies.

# ENTERTAINMENT HEADQUARTERS

Bringing family and friends together.

## REC HIGHLIGHTS:

- Fiberglass bar with granite-look, two-tiered countertop.
- Four over-sized bar stools with a modern-look stainless steel back.
- Cupholders for all the crew!
- Bottle opener, built-in storage, 12-volt, USB charger, and five cupholders make this a very functional bar for entertaining and long days out on the water.

## FISH AND CRUISE IN COMFORT

While our world may have become more complicated, the PFC simply adapts to the moment. Whether your mood is fishing or partying, this layout rises to the occasion!

### PFC HIGHLIGHTS:

- Rear fiberglass workstation features:
  - » Insulated and aerated livewell
  - » Built-in cupholders (2)
  - » Upright rodholders
  - » Fishing rod rocket launchers
  - » Built-in storage for tackle tray
  - » Rear access to even more storage, batteries, etc.
- Two rear gates provide dual access to the extended rear swim platform
- The PFC model has deluxe high-back captain seats
- Simrad Go7 offers GPS navigation, charting, and fishfinder

# THE SPORTBOAT CROSSOVER | DUAL CONSOLE

## Turning heads on the lake

Our Dual Console layouts have more of a “sport boat” look and feel but the full windshield and second console provide useful protection from the wind, thereby, also enabling an extended boating season.

# DON'T LET THIS FISH GET AWAY...

Pontoons have a long history with fishing, in fact, some of the best fish stories came from the deck of a pontoon. You can fish from any pontoon, but Coach Pontoons offers a modern fishing layout with added angling accessories built right in.
